

Upon opening, this is the default or the home page of the HTML Webpage. There's a navigation bar and it contains hyperlinks to go to another HTML page. It is also having a footer on every HTML page.

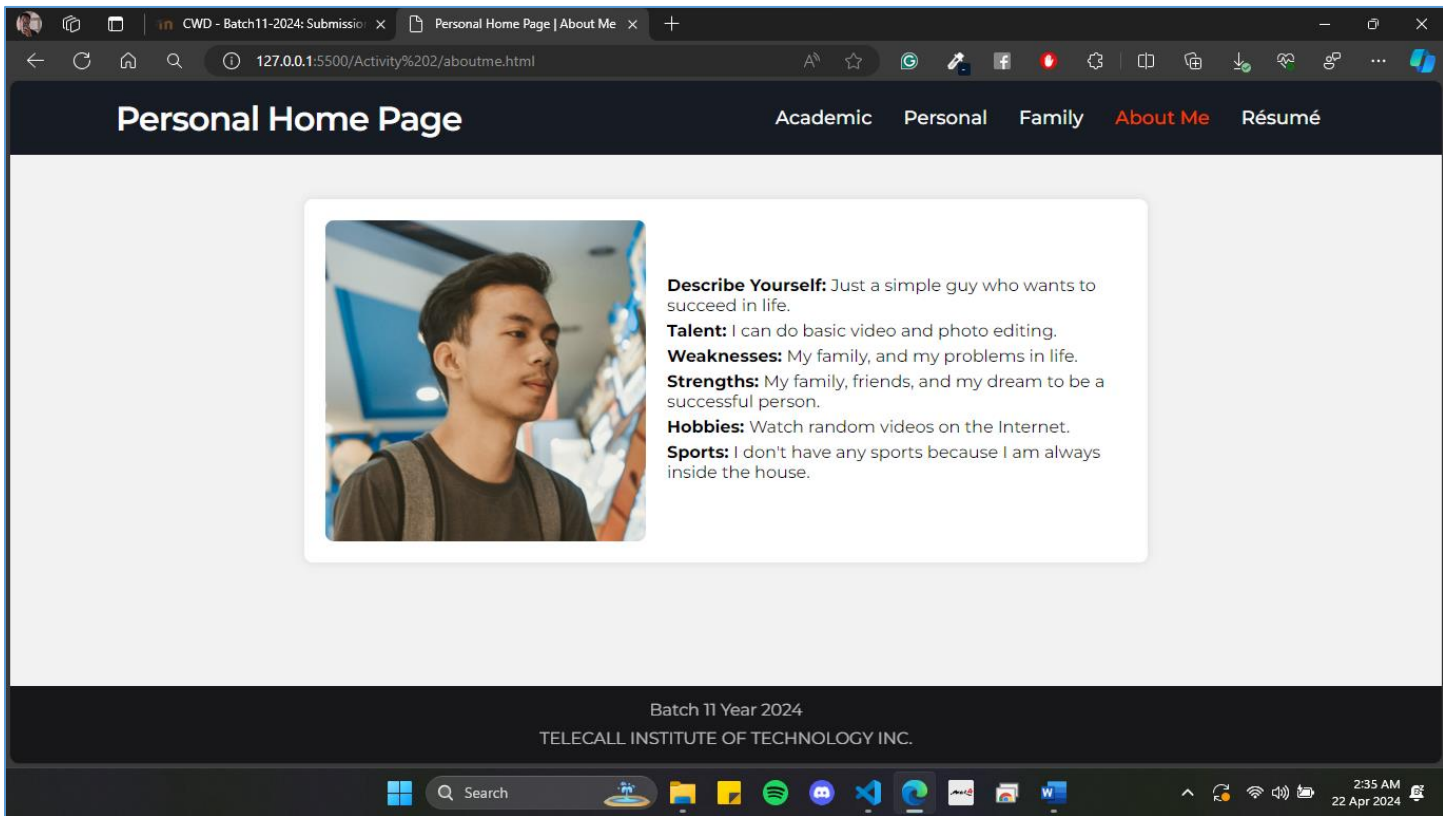

This is the Academic Information page. It contains a photo and basic information of the school and the student.

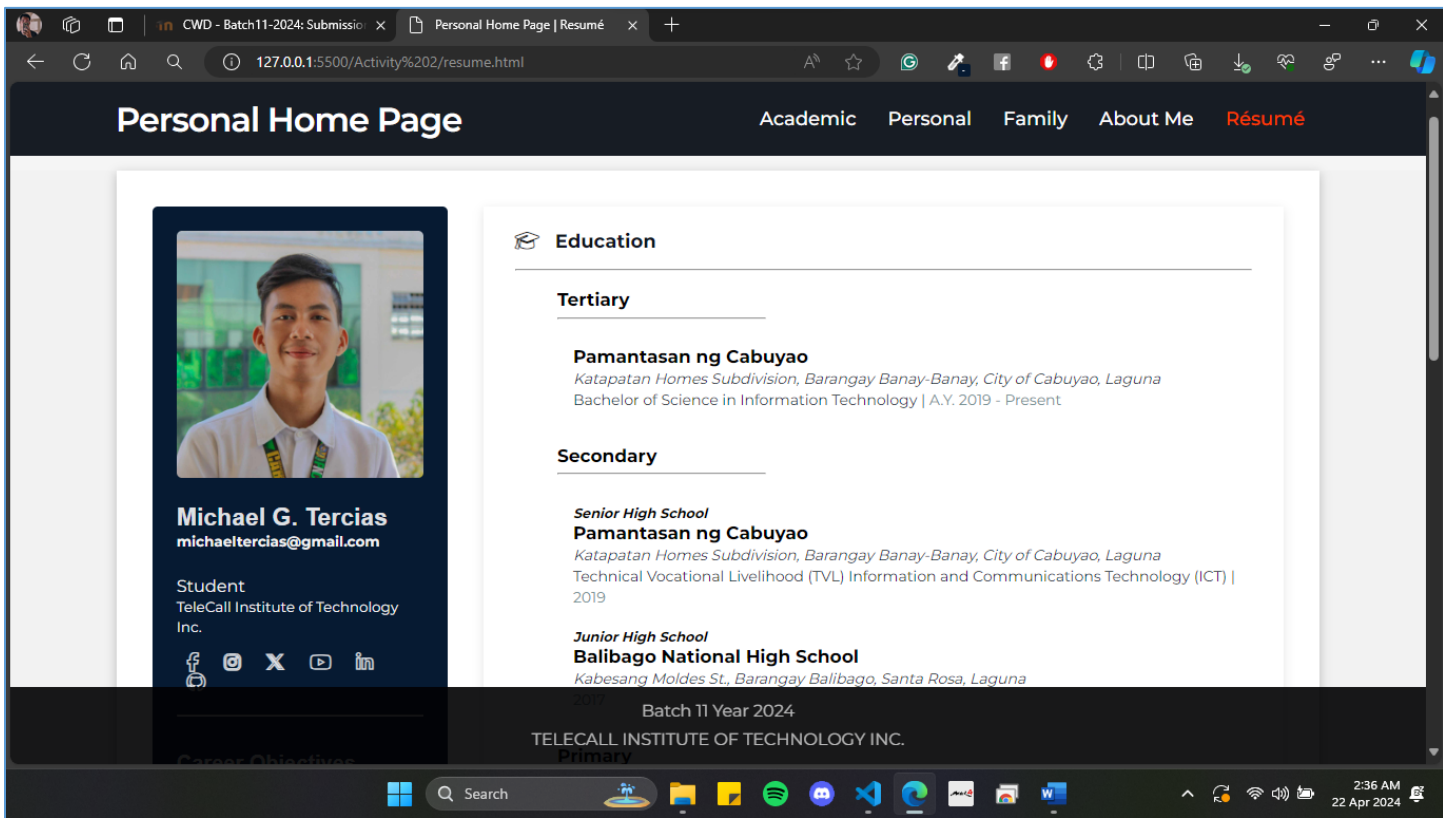

Personal Information page, contains a photo and personal information of the student.

Contains parents' and siblings' information.

The About Me page contains information about myself.

This page displays my resume from the previous activity. All the HTML pages can go to Home by clicking the "Personal Home Page" text on the Navigation Bar.

All I can say is my brain and knowledge has been refreshed by this activity. I really love designing and creating websites. I am looking forward for more activities so that can I gain new knowledge and skills throughout the training.
